platform

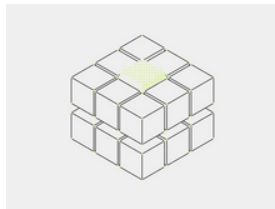

## Invisible platform

The Invisible Platform is a modular AI operating system that helps you solve challenges from messy data to agentic execution, using only the components you need.

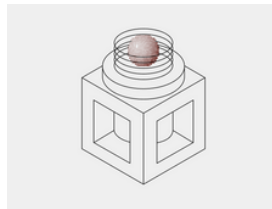

### DATA PLATFORM **Neuron**

Unify fragmented data from any source or format into a clean, structured layer for analysis and automation.

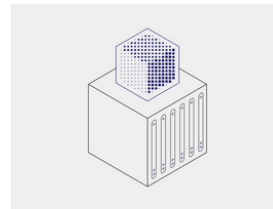

### PROCESS BUILDER **Atomic**

Turn manual workflows into automated processes and connect with 300+ integrations.

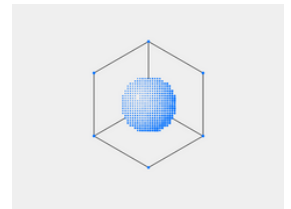

### HUMAN TRAINING **Experts**

Find top-tier specialists to fine-tune your models, with custom sourcing available on demand.

### EVALUATIONS **Synapse**

Train your model to your specifications and evaluate outputs for quality, safety, and accuracy.

### AGENTIC **Axon**

Build and deploy AI agents tailored to your processes with coordinated handoffs and full control over training and execution.

Engineered for  
complexity

Deeply technical team.

Built together,  
not off-the-shelf.

Customized modular platform.

Human judgement.  
Machine scale.

Global elite talent marketplace.

# Private Equity

AI is redefining speed, precision, and visibility across the deal cycle — from sourcing to exit. It surfaces opportunities earlier, ties value creation directly to outcomes, and brings real-time clarity to portfolio performance. The firms embedding intelligence across operations, reporting, and compliance aren't just automating workflows — they're compounding insight.

## Strategic challenges

01

### Deal sourcing & due diligence

Pipelines are opaque. Datarooms are disjointed. Origination is still manual.

02

### Value planning & monitoring

Progress is hard to see. Impact is harder to prove. Portfolios operate in silos, disconnected from financial outcomes.

03

### PortCo performance reporting

Every portfolio company reports differently. Data is fragmented, errors compound, and reporting drags.

04

### Regulatory & compliance obligations

Data is inconsistent, verification is manual, and reporting remains fragmented across qualitative and quantitative sources.

05

### Back-office speed and agility

Legacy systems, lean teams, and manual workflows slow execution and scale.

## Recommendations

### Generate visibility

Use propensity and early-warning models to sharpen focus, track momentum, and fast-track the right deals.

### Measure what matters

Link every initiative to measurable financial results. Track milestones, inputs, and outputs in real time to see where value is created — and where it's lost.

### Create a data mesh

Aggregate and clean performance data across systems through a shared data layer. Give investors a single, trusted view of portfolio performance.

### Automate verification

Automate KPI aggregation and anomaly checks. Build traceability into every reporting source to strengthen accuracy, oversight, and audit readiness.

### Reimagine the process

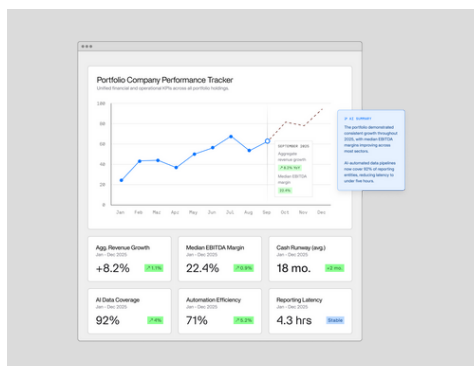

Automate high-volume operations and deploy agentic systems that streamline document handling and decision support.

## Key use cases

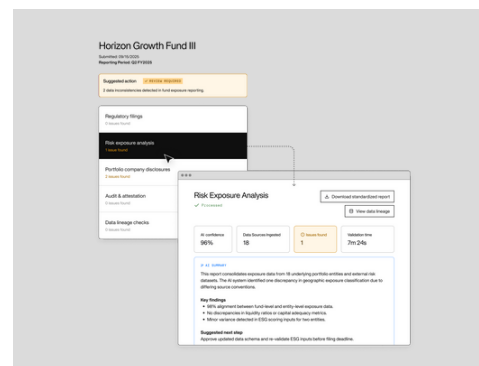

### Deal sourcing & origination

Identify market signals through the noise, aggregate market data, and create systemized deal-flow processes.

### PortCo data reporting

Create data models and processes that unify portfolio reporting, aggregate KPIs, and automate pipelines to track performance.

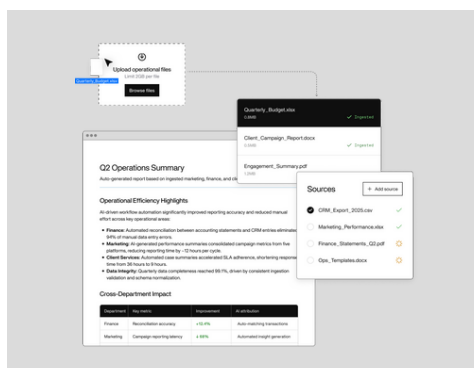

### Compliance and risk reporting

Standardize data sources & reporting templates, automate data flows, and ingest qual / quant data at scale to improve accuracy and reliability.

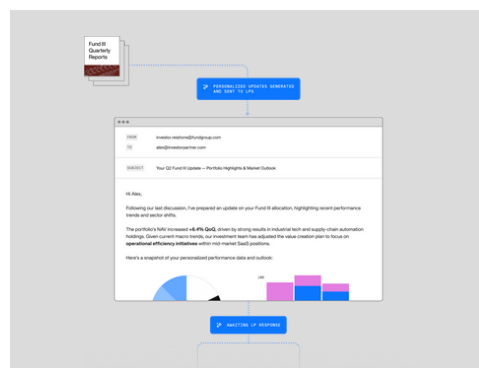

### Value creation tracking

Create, monitor, and update value planning and strategic roadmaps that support PortCo KPIs and growth targets.

### Operations optimization

Streamline document handling, data entry, and reporting to free across marketing, finance, and client services teams for higher-value work.

### LP relations

Automate communications, performance summaries, and data pulls, tailoring insights to investor profiles and enhance transparency during fundraising cycles.

## We make AI work

Learn why leading enterprises trust Invisible to bring efficiency to their operations.

We'll walk you through what's possible.

No pressure, no jargon — just answers.
